

# Complete 3PL Warehousing And Fulfillment Services

**Having implemented our sales services, you may want to consider relying on our comprehensive 3PL warehousing and order processing services to streamline your fulfillment process.**

Utilizing our 3PL services can free up space, centralize far-flung parts into a single location, and expand aftermarket sales without adding infrastructure to handle the additional order processing. Think of ThoughtFocus as an extension of your warehouse, expanding your logistics footprint to optimize your active inventory, and better support your repair customers. A blended fee structure accommodates a mix of one-time, monthly, and transactional fees.

We offer the option of Virtual Inventory Management, integrating your inventory into our online system for control management and sales ordering, or moving physical assets to ThoughtFocus for warehousing and distribution. Following a one-time, parts-receiving process, our team assumes responsibility for:

- Inventory control
- Cycle counts
- Document control - trace documents
- **Warehousing**
- Pick, pack, and shipping services (including customs declaration)

Our 3PL services integrate seamlessly with your enterprise IT systems - Quantum, SAP, Pentagon or any other ERP system. With this integration,

ThoughtFocus appears as just another location in your warehousing operation. We mirror your network, following your branding requirements on shipping, packaging, and sales documentation, linking with your sales and credit reporting systems. Standing shoulder to shoulder with you, ThoughtFocus appears to your customer as part of your business, your solution. We will always remain a partner, not a competitor.

## The ThoughtFocus Commitment

ThoughtFocus offers a broad range of integrated sales and support services that helps resources-constrained clients meet the challenge of growing their revenue. Our client-focused solutions, backed by a thorough understanding of the aerospace and defense marketplace, afford you incomparable value across the serviceable parts spectrum.

From rotatable parts harvesting at teardown to expendables and consumables, from inspection and certification/documentation to inventory management and surplus parts marketing and sales, ThoughtFocus stands ready to advise, lead or support your aircraft parts sales effort in whatever way necessary.

When time to market is critical, budgets are tight, resources are already committed or costs are spiraling out of control, let ThoughtFocus help you maximize your business opportunities.

## Product Delivery

- We offer a global footprint with domestic and offshore capabilities and facilities for industrial engineering, software development, and hardware design and manufacturing. You can leverage our capabilities to extend your product and service lines, optimize costs, tap additional expert resources, and adapt to fluid global industry
- We offer you the flexibility to scale operations to meet mission-critical requirements, while enhancing and sustaining existing product lines
