

Aerospace transformation

Adjust, adapt, evolve, succeed

Delivering transformative solutions

In the face of rapid technological advances, market consolidation, competitive threats, growing customer demands, new market opportunities, changes in capital requirements, and other pressures, aerospace businesses must transform how they do business or be left behind.

ThoughtFocus propels change throughout the aerospace enterprise-re-engineering processes, empowering people, expanding enterprise knowledge, and instituting new systems that help clients develop winning products and services, delight customers, and drive profits.

Capturing and managing end-to-end process flow

360-degree, real-time digital solution aligning product/service development, manufacturing, QA, marketing, sales, ERP, and CRM in a unified approach to solution creation and delivery.

- Synchronize enterprise functions
- Provide value-added context to decision-making
- Harmonize the customer experience across functional lines
- Integrate efforts into a single, networked, operations backbone

Apply business enterprise intelligence

ThoughtFocus' total solution approach stems from deep experience in aviation and aerospace product and service delivery... assisting you in developing new ways of thinking and working that automate functions, increase productivity, boost performance, improve quality, save money, and result in a faster time to market

Domain area expertise from product planning through recycling

- OEM
- MRO-components
- Aftermarket OEM
- Parts distributions
- MRO - heavy
- Assets management
- MRO-engines

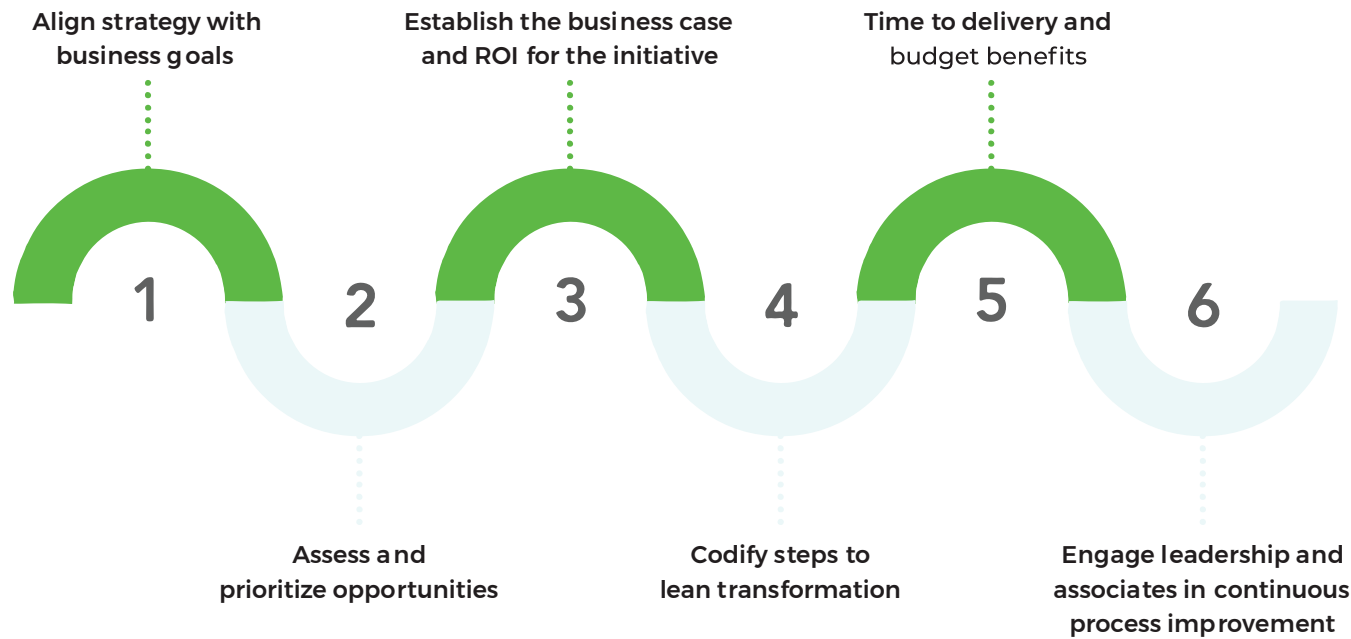

Consult > guide > execute

Business functions do not exist in isolation: product/service design impacts manufacturing and production, which impacts quality, which impacts certification, which impacts delivery... all of which impact cost and customer satisfaction.

ThoughtFocus designs and delivers tailored solutions that replace silos with easily integrated, intelligence-driven approaches that optimize the overall functionality of the enterprise

The transformation journey

We aid in this transformation by providing strategy, planning, development, and implementation services to create and sustain the evolution of your business.

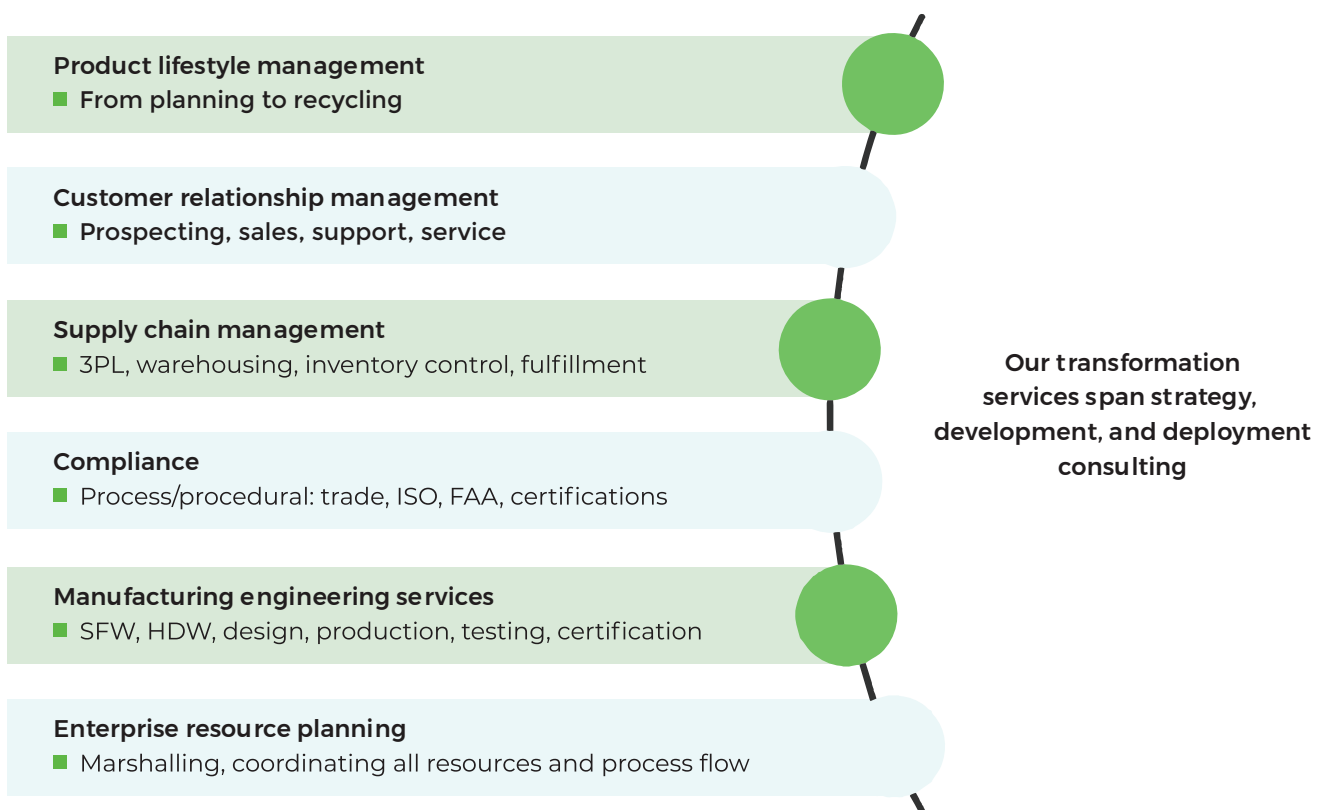

Creating unparalleled business value

The business transformation ecosphere incorporates all elements of the enterprise, evolving the organization bogged down by "business as usual" into an agile entity that is robust and resilient - an intelligent, visually managed, connected enterprise adapting to changing requirements and environments.

Lean transformation

Optimizing people, processes, and systems

We leverage business intelligence by capturing all transactions and automating change, providing you visual controls and actionable information that enables real-time adjustments to events and incidents which impacts downstream process flow elements. Autonomics empower enterprise business leaders and associates with visibility and transparency to deliver projects on time and budget.

Advanced business transformation

Delivering the full promise

ThoughtFocus employs a variety of efficiency technologies to transform your businesses, relying on our vast experience in embedded applications and business/machines control systems. This fusion of technologies helps **capture and process information on the environment, people, and machines - assessing status, location, actions, and exceptions to empower smart systems that inform, alert, coordinate, and connect all process stakeholders, delivering the right thing at the right place at the right time on the right device.**

RFID smart tags, barcode readers, environmental sensors, access control, visual controls, and management, video, wearable devices, Andon lighting, sensor fusion, ZigBee, Wi-Fi, connectivity to the Internet of Things ... all of these technological advances provide the data that informs transformation.

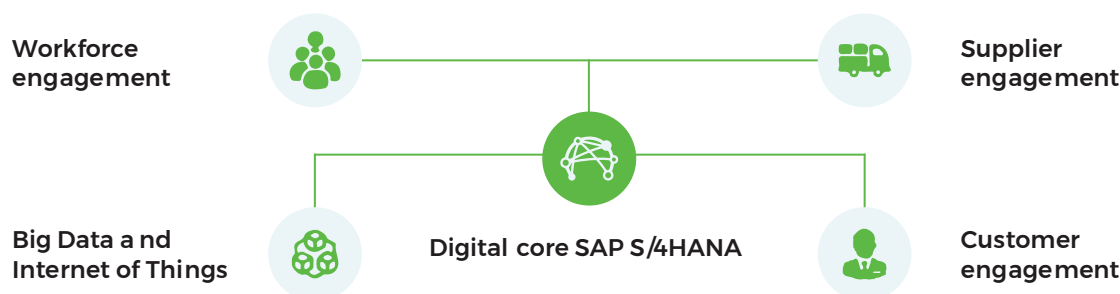

Specializing in SAP S/4HANA - run simple, run smart

Enhanced data management, analytics, app development, and more accelerates innovation

Whether you are employing legacy systems, migrating to HANA or deploying a new ERP platform, ThoughtFocus' Enterprise Network Innovations team provides both in-depth S/4HANA support as well as custom solutions that integrate equipment and product data throughout the enterprise to dramatically improve efficiency, enhance customer service, and increase revenue.

Experience

Supporting aviation and aerospace with advanced engineering design, manufacturing, and compliance testing of new and upgraded parts. For product line expansion, new market initiatives, and better, more cost-effective business process management.

Business Partner

- A valued business partner to aviation businesses around the globe, ThoughtFocus assists partners in lowering costs, scaling growth, and improving time to market.
- An integral part of our clients' solutions delivery team, we form strong relationships with their management, manufacturers, and suppliers; ensuring complete transparency and tight alignment between teams and executive priorities.
- ThoughtFocus knows aviation and aerospace manufacturing, design, testing, and IT from OEMs to aftermarket service providers, continually advancing our experience and industry-leading methods, investing in personnel and tools, and creating innovative solutions to supply chain challenges
- Our expertise in re-engineering processes and implementing strategic enterprise solutions has helped our business partners optimize logistics cycles, establish manufacturing and supply chain networks, overhaul existing systems and approaches, and achieve significant cost savings.

About us

ThoughtFocus helps forward-looking companies and organizations in the financial services, manufacturing, and higher education/public services sectors innovate and achieve a better future faster. ThoughtFocus' innovative and cutting-edge technology solutions enable its customers to deploy new capabilities faster, deliver better user experiences, and drive operating efficiencies. We do this through executional excellence and mitigating the risk of change. With headquarters in the U.S., the Company has more than 2,100 employees in locations spread across five countries.
