

Embrace a Cloud-First Mindset

SEAMLESSLY SCALE AND MIGRATE YOUR APPLICATIONS TO THE CLOUD

A full range of cloud consulting, advisory, and technology support services

When it comes to migrating to the cloud, there is no one-size fits all approach that works for everyone. How you think about your cloud migration depends on your business model, maturity, size/complexity of your existing infrastructure, and your budget.

ThoughtFocus can help you achieve a better future faster, understand all your options, and then design a roadmap so you know which apps to migrate, how to migrate, and when – all while keeping costs under control.

Whether you do everything at once or take the hybrid approach of running an on-premise captive data center, hosting with a private third-party, and/or using the public cloud, ThoughtFocus can help you seamlessly scale and migrate your chosen application workloads cost effectively.

CLOUD MIGRATION DECISION TREE

There are many ways you can achieve your cloud goals. Let us help you design a cloud roadmap that considers your unique business goals, timeframes, and budgets.

CLOUD SERVICES

CLOUD STRATEGY SERVICES

- Planning assessment, architecture audit, cloud roadmap and strategy, and multi-cloud strategies and assessments
- Security and risk assessments
- Migration analysis

MAINTENANCE/SECURITY/DRM

- Continuous monitoring, performance optimization, data protection
- Disaster recovery management services and recovery plans
- Remote back-up management

CLOUD MIGRATION SERVICES

- Cloud-to-cloud movement, workload migration, validation and performance testing

DATA CENTER TO CLOUD MOVEMENT

- Microservices-based architecture

CLOUD-BASED APPLICATION MONITORING

Tailor monitoring systems to desired migration outcome

- Optimization for better performance and cost savings

CLOUD APPLICATION DEVELOPMENT SERVICES

- Develop, customize and migrate applications
- Application design
- Custom APP/DB development
- DevOps
- Continuous delivery
- Microservices and containers
- Automation

MANAGED SERVICES

- Infrastructure management, operation management, cloud infrastructure and application deployment as well as cloud modernization services

DEVOPS CLOUD CAPABILITIES

- SRE focused templates
- Expertise with Azure DevOps, GitHub, Atlassian and AWS DevOps
- Inherent BCP focus
- End-to-End Workflows
- ServiceNow integration
- Cloud Migration of on-Prem DevOps platforms
- Turnkey solutions
- Managed services, augmented services and warm handoff models

PROVEN CAPABILITIES IN ALL MAJOR CLOUD PLATFORMS

**Ready to
embrace
the cloud?**

ThoughtFocus has deep expertise in cloud migration and governance with a cloud first mindset. We have helped numerous manufacturers solve complex cloud initiatives.

ThoughtFocus provides an entire range of cloud services encompassing the public, private and hybrid cloud types.
